## PRESS RELEASE

### Repado Contributes to NU-RISE's FDA Clearance for PRO-DOSE System

Repado is proud to congratulate **NU-RISE** on achieving **U.S. FDA clearance** for its **PRO-DOSE system**, an advanced real-time dosimetry solution for radiotherapy treatment verification.

The PRO-DOSE device provides real-time measurement of radiation doses delivered during brachytherapy procedures, enabling clinicians to monitor dose and dose rate directly and accurately. The system combines calibrated probes with dedicated hardware and software to provide immediate feedback during patient treatment.

Repado contributed to this milestone by supporting the development the **PRO-DOSE software**, responsible for data acquisition, **high throughput** signal interpretation, and real-time visualization. The collaboration ensured that the software met the highest standards of reliability, cybersecurity, and regulatory compliance required for medical device software, developed under an enhanced documentation level in accordance with FDA expectations.

“Our collaboration with NU-RISE has been a true partnership; built on mutual trust, technical excellence, and a shared mission to advance safer cancer treatment,” said Kostas Delakouridis, CEO at Repado. “Seeing PRO-DOSE achieve FDA clearance is a proud moment for both teams and a testament to the strength of cross-disciplinary collaboration.”

“The Repado team’s technical excellence, responsiveness, and shared commitment to quality were key to turning our vision into a robust and compliant product that meets a real clinical need. We’re truly grateful for this partnership and the collaboration behind it” said Joana Melo, CEO & Founder at NU-RISE.

This milestone marks the culmination of years of collaborative R&D, rigorous testing, and alignment across engineering, quality, and regulatory disciplines. With FDA clearance secured, NU-RISE is now positioned to advance its commercial strategy and bring PRO-DOSE to clinical settings across the United States.

Repado congratulates the entire NU-RISE team on this remarkable achievement and looks forward to continued collaboration in bringing innovative medical technologies to market.

### **About NU-RISE**

NU-RISE is a medical technology company specializing in radiation dosimetry systems for real-time monitoring and quality assurance in radiation therapy. With a focus on safety, precision, and clinical impact, NU-RISE develops cutting-edge solutions to improve patient outcomes in oncology care.

### **About Repado**

Repado is an ISO 13485–certified software development company specialized in medical device and SaMD software. With nearly 20 years of experience in regulated software, Repado partners with manufacturers worldwide to deliver innovative, compliant, and high-performance digital health solutions.
